

workshop

„Large scale low input organic milk and meat production and processing“

October 11th-15th 2011

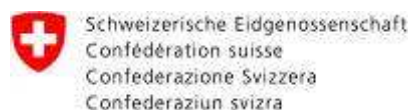

Dresden, Germany

Organisers:

FiBL - Research Institute for Organic Agriculture

**EkoConnect - International Centre for Organic Agriculture
of Central and Eastern Europe**

With the financial support of:

Swiss Confederation

Swiss Confederation

At “Gläserne Molkerei” – organic milk processing factory with the maximum capacity up to 100 tonnes processed milk per day

“Brodowin” – an organic farm with about 600 organic cattle, small on-farm milk processing factory processing up to 10 tonnes of organic milk per day as well as an on-farm organic store and restaurant

“Backschwein Tenne” – an organic free-range pig farm with an on-farm restaurant

“Agrargenossenschaft Großzöbern” – an organic milk production farm with 330 milking cows and biogas production

Organic milk processing expert Mr. Axel Helmecke talked about building an organic milk processing factory (requirements, planning, technical realisation, risks, costs etc.)

“Biohof Ohler” with organic beef and organic pork production as well as a small slaughter house

Lunch in an organic restaurant “Spreehof” followed by a presentation of Mr. Eric Meili (FiBL) about organic beef production and processing

Visit of an organic farm “Fleischerei Vorwerk Podemus” with an organic on-farm slaughter house including a small organic meat processing factory and also an on-farm organic shop

25 participants from Ukraine, Russia, Georgia and Poland took part in the workshop. EkoConnect would like to thank once more the participants for taking part, FiBL for co-organising and Swiss Confederation for supporting the workshop.
